CONSENT FOR DENTAL MINI SURGICAL IMPLANTS

I, _____, have been informed and understand that one

(Patient Name:)

or more “mini” dental implants are available to certain dental patients. These mini implants are small diameter (1.8mm to 2.3 mm) titanium alloy dental implants screws that are placed in a patient’s jaw to provide immediate and long-term stabilization of my dental prosthesis. I wish to undergo this procedure as a patient of Dr. Mathur. I have requested Dr. Mathur to place one or more mini-dental implants into either my jaw.

I have also been fully informed by Dr. Mathur that the purpose of this dental implant procedure is to provide support for my lower jaw and to enhance function, and I hereby consent to the surgical insertion of long-term mini-dental implants in my jaw by my clinician. I understand that in the event the mini-dental implants implanted by Dr. Mathur fail they will be removed through a subsequent surgical procedure.
